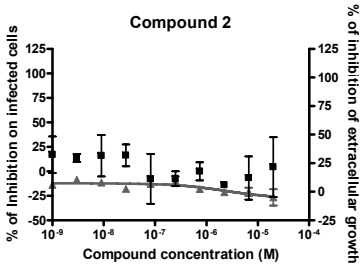
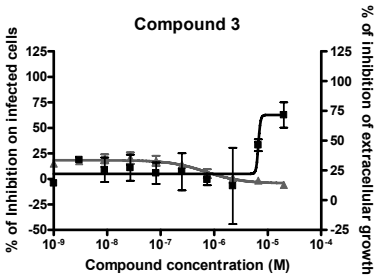
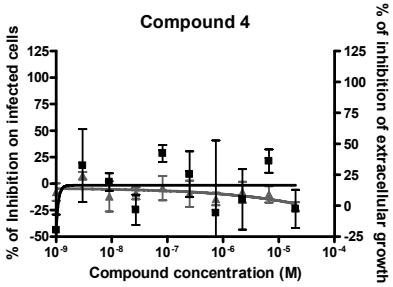
Compound 1
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)



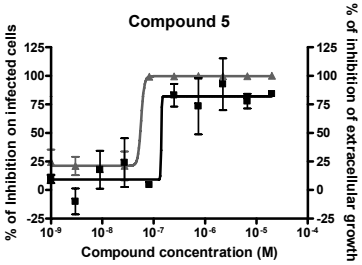
Compound 2
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)



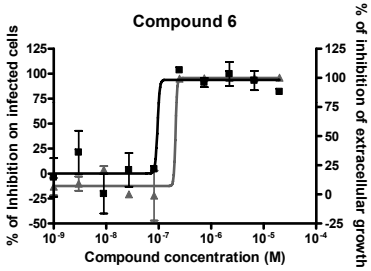
Compound 3
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)



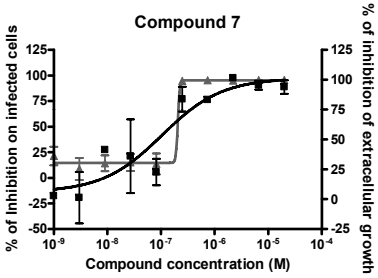
Compound 4
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)



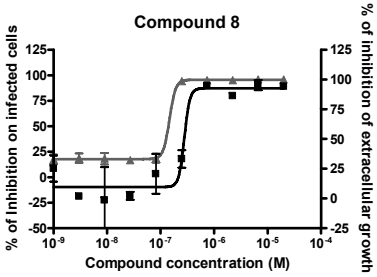
Compound 5
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)



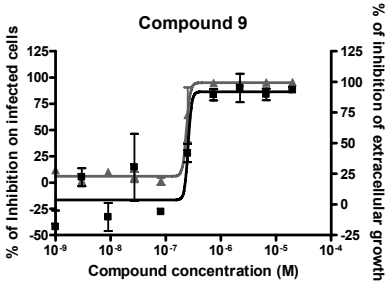
Compound 6
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)



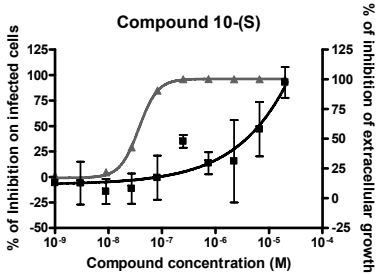
Compound 7
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)



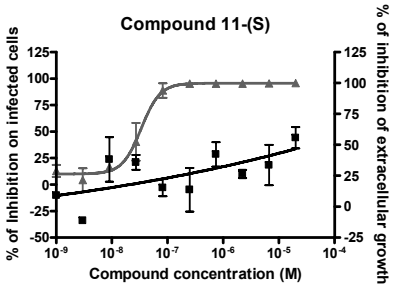
Compound 8
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)



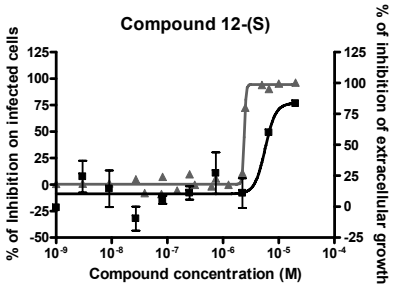
Compound 9
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)



Compound 10-(S)
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)



Compound 11-(S)
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)



Compound 12-(S)
% of Inhibition on infected cells
% of inhibition of extracellular growth
Compound concentration (M)
